Results-oriented software engineering professional with more than 7+ years of experience in field. Well-versed in promoting object-oriented approaches to real-time software development. Analytical and detail-oriented.

Relevant Experience

Software Developer @ GL Homes

July 2019 – March 2020 // Sunrise, FL

- Developed on Episerver's CMS platform to implement tools for content editors to consume, using generics and reflection to design and implement highly scalable pages and blocks with C# MVC
- Deployed and monitored web site in Azure and Application Insight for downtime and critical issues
- Lead a team of developers and QA through SDLC and sprints which always delivered on-time and met/exceed expectations
- Delivered and maintained scalable system architecture to support high-availability Internet site with various internal applications.
- Integrated with major real estate platforms, such as Zillow and BDX, via scheduled services.

Software Developer @ FirstService Residential

Nov 2015 – July 2019 // Dania Beach, FL

- Rewrote legacy accounting web apps to use Angular.js and MVC API that improved performance, efficiencies, and automations that is reflected in company profit margins
- Designed and implemented utility services to aid developers working with the in-house API to cut down development time and cost
- Extended in-house ORM with filtering capabilities to optimize the query constructor
- Spearheaded the TDD initiative to automate testing on the roadmap to CI/CD
- Enhance existing accounting application with new features such as the ability to import bulk data of charges and credits to avoid tedious data entry
- Designed and implemented a window service to automate daily accounting processes to lighten the workload of field accountants
- Managed an offshore team of 13 developers working on support tickets to ensure code quality and business logic are up to standard

.Net Developer @ WujiTouch Software

Nov 2013 – Nov 2015 // Delray Beach, FL

- Implemented a job listing web app using Bing's map API to provide graphical geolocations of jobs
- Created console applications and Windows services to automate mundane daily tasks to cut cost
- Worked with clients to assess their business needs, provided technical support, and delivered enhancements on time to increase business

Skills

Programming Languages

C#, Python, Java, JavaScript, TypeScript, HTML, CSS/Sass, GraphQL

Libraries & Frameworks

jQuery, Angular, Node.js, Express, Django, Flask, Blazor, Razor, MVC, .Net Core

Database

MSSQL, Mongo, MySQL

Tools & Platforms

Git, Azure, Docker

Knowledge

Agile, Kanban, TDD, BDD, OOP, SOLID, Design Patterns

Education

DeVry University

2010 – 2013 // Miramar, FL

Bachelor of Science in Information Science Computer Engineering Technology

Interests

Coding, gaming, comics, anime, and staying relevant with latest technology stack
